French Regency mantelpiece hand-carved in Estaillades stone

This large fireplace is carved by hand in a natural limestone from Provence, the Estaillade stone. Hand-crafted in Provence, this beautiful mantelpiece is an original creation inspired by the classic French Regency mantels. It features a pair of intricately carved jambs and an arched lintel decorated with a finely hand-sculpted central shell. Beautiful sculptures are also visible at each ends of the lintel. An opulent molding surrounds the entire hearth opening. The tablet is finely molded.
