Limestone fountains and basins

Central fountains in stone

Large and square molded basin sold with its Gothic-style column in stone

This large and tall basin is a hand-crafted water feature in carved natural French limestone : the Avy stone (frost-resistant). The rather tall square basin features wide and thick molded copings seating on imposing concave basement stones. The high octagonal central column is shaped like an obelisk and bears a charming Gothic style. It is very finely hand-sculpted with moldings and is fitted with 4 wrought iron water outlets.
