

Provençal fountain with octagonal basin and column crafted in stone

This beautiful Provençal fountain is a superb handcrafted creation in natural French limestone, Pierre d'Avy (a firm and frost-resistant limestone). This octagonal fountain has a large yet shallow basin topped by wide copings and a central octagonal column with 4 forged water spouts in wrought iron. The overhanging capital is decorated with a small ball in stone.

Height 175 cm

Width 210 cm

Depth 210 cm

- Basin's height : 45 cm

Price

5340 €
